

do'stlik shaharining tayanch
ko'rsatkichlaridan biridir MB
ning hojmi (solishtirma baho-
larda) — mamlakatning iqtis-
odiy-jamoiy salohiyatini ifodal-
laydi, jori boshiga bog'ri be-
latilgan miqdori esa — mam-
lahatning iqtisodiy rivojlan-
ishiga qisman baho beradi.

Statistika da milliy bog'liqlarning
tashkiliga milliy mulk — mehnat
mahsuli bo'lgan va hisoblash
vaqtida mavjud bo'lgan boy-
likdan tashqari tabiiy resurslar
ham kiritiladi.

2) $t = \frac{K}{m}$
K - kredit qoldiq
m - bir kunlik darot
t - foydalanish vaqti
8 $n = \frac{D}{t}$; $n = \frac{Q}{K}$
D - kunlar soni
Q - kredit ob'roqi
n - kredit ob'roqi soni
 $K_{MB} = \frac{803}{7} = 114,7$
 $K_{KB} = \frac{322}{7} = 46$
 $K_{MBV} = \frac{250}{7} = 35,7$
 $K_{MB} = 111,6$
 $K_{KB} = 40,8$
 $K_{MB} = \frac{287}{7} = 41$
 $K_{MB} = \frac{272}{7} = 38,8$
 $K_{MB} = \frac{300}{7} = 42,8$

$$n_{\text{m}} = \frac{303 + 322 + 250}{41,6} = 21$$

$$n_{\text{v}} = \frac{287 + 272 + 300}{40,8} = 21$$

$$n = \frac{21 + 21}{2} = 21$$

3-masala.

$$AC_1 = AC_0 + AC_{\text{kir}} - AC_{\text{chir}} = 4948 + 646,6 - 248 = 5346,6 \text{ mln. so'm}$$

$$AC_{\text{chir}} = 4948 \cdot 0,34 = 1682,32 \text{ mln.}$$

$$AC_0 = AC_0 - AK_{\text{chir}} = 4948 - 1682,32 = 3265,68 \text{ mln so'm.}$$

$$AC_1 = 3265,68 + 646,6 - 2 - 146 = 3765,28 \text{ mln so'm.}$$

| Asosiy kapital balansini | | | |
|--------------------------|----------------|-----------|--------------|
